

AMENDMENTS TO THE SPECIFICATION

Please amend paragraph [0049] on page 22as follows:

In the example of FIG. 8, when the currently displayed screen 1a is transitioned to the switching target screen 1b, the resultant screen 1c is displayed on a display. In this example, the currently displayed screen 1a and the switching target screen 1b have separate display positions, so that the currently displayed screen 1b ~~7b~~ does not overlap the switching target screen 1b. Specifically, as illustrated in the resultant screen 1c, the currently displayed screen 1a needs to be left, so that the screen discard determination section 105 determines that the currently displayed screen 1a is not discarded (i.e., NO).
